The idea of the testimonial collection will give opportunity to design the principal strategies for the training implementation and deployment. We will use as well collected opinions for the SWOT Analysis, being one of the quality tools for improvement of the final product of the project. All testimonials will be the part of the Guide Tool.

## Examples of the interview questions:

What subject do you teach?

How long do you teach in primary school?

Which classes do you teach?

How do you assess GoDigital training?

Do you know how will you use the skills acquired during the training?

Do you have any suggestions for training improvement?

Will you recommend this training?

Is this training needed for teachers in primary school?

## Examples of testimonials

**Valia Ilieva, age 55**

**Primary school teacher, Bulgaria**

**I am teaching Bulgarian language and Literature, Mathematics, Social studies, Geography, Arts, History etc. to pupils from 1<sup>st</sup> to 4<sup>th</sup> grade.**

**During the training I learnt how to prepare more attractive presentations and how to use applications in Internet, which will make**

the whole teaching and learning process funnier and more understanding for the pupils. For first time in my teaching experience I found tools I can use to improve the learning process for the students.

**Katia Chimeva, age 53**

**Primary school teacher, Bulgaria**

I am a teacher since 1997. I usually teach the youngest pupils from 1<sup>st</sup> to 4<sup>th</sup> grade. As such young students sometimes, they are very hard to keep their attention on the studying material. The training helped me to acquire new digital skill, which will help me to make my classes more interesting and educating. My personal opinion is that every school teacher needs to improve their digital skills, because it will make easier their work with the students.

**Milena Tumbeva, age 37**

**Primary school teacher, Bulgaria**

I am teacher in Fifth Primary School “Georgi Izmirliiev” in Blagoevgrad for already 10 years and I see how much the new generation has changed and how their needs are more and more oriented towards technologies. I am very happy I could attend the GoDIGITAL training because it showed me many new Apps and tools I can use during my classes and also new features on programmes I have used. I definitely recommend the training particularly for primary school teachers.

**Kapka Paljusheva, age 52**

**Primary school teacher, Bulgaria**

I am a teacher for 19 years and I love my job. As a primary teacher (1<sup>st</sup>-4<sup>th</sup> grade) I have to teach all basic classes. Pupils, especially when they are so young, are getting exhausted not only from the material they need to learn but also if it is only theoretically presented. In this matter the training helped me a lot to learn how to use and implement more and new interesting digital tools when I teach. I really found quite useful to learn about some Power point features I didn't know how to use before. What I recommend about the training is that it can be made regularly or at least for longer time.

**Liudmila Borisova, age 56**

**Primary school teacher, Bulgaria**

I am primary school teacher in Fifth Primary School "Georgi Izmirliiev", Blagoevgrad. My teaching practice is already 29 years. I participated in GoDIGITAL training and it showed me many new ways of improving the teaching process. The biggest challenge for me was to understand most of the Applications because, there was a huge language barrier, even though everything was very well explained by the trainers. When I decide to use some of the tools or the opplications, I will still need help.

Nevertheless, I can make the learning process for my students much more attractive and easier with help of Gmail, too. I wasn't aware that I can share documents so easily and still can have a look on student's progress on it.
